Dear @Tam Nguyen Khac and team,

Thank you for the updates.
We have confirmed that we can now access the eCom web without any issues, and some users have reported that they are now able to use it as well.

We will keep you informed if any further issues arise.

Hi @Kaci Yee,
cc @Normerishah Binte Alamshah

I'm sorry for this inconvenience. We just fixed the issue and it's back to normal now.
Root cause: Server slowness impact to health check status timeout. It makes containers keep restarting. I extended the health check timeout from 5s to 180s to avoid container restart.
We'll keep monitoring on that. Thanks.

Best regards,
Tam
